**REACH OUT TO STUDENTS PROGRAMME**

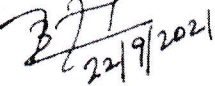

Sir,

Vikram Sarabhai Space Centre and ISRO Inertial Systems Unit have been organizing special programmes for teachers and students as part of World Space Week celebrations since 2002. Department of Education has actively partnered with us in conducting these events in the past few years. This year too, VSSC/IISU is organizing a 'Reach Out' programme for students from 5<sup>th</sup> to 12<sup>th</sup> standard. The programme intends to reach out to the students through web-based lectures and content related to 'Space' and will be conducted during the World Space Week viz. October 4<sup>th</sup> – 10<sup>th</sup>, 2021.

- One-hour online lecture by scientists from VSSC/IISU (Parallel lectures) on 'Fundamentals of Space Technology' is planned for students in the **Upper primary, High School and Higher Secondary** categories. Schools can register in the registration link provided in our website (<https://wsweek.vssc.gov.in/reachout.php>) and enroll their students for the lecture, the schedule and modalities of which can be decided through mutual discussion. The sessions will be conducted through Google meet, Microsoft Teams, Zoom or Webex platforms at a time convenient to the school and the speaker.
- Exclusive web content on fundamentals of rocketry, satellite technology & fields of Space technology such as Propulsion, Navigation, Controls etc. will be available for viewing for the students. Students can access the content any time during the space week by visiting the link provided in our website from October 4<sup>th</sup> to October 10<sup>th</sup>, 2021.
- There is also a golden opportunity for the students to pose their Space related questions in the link provided, between 4<sup>th</sup> to 8<sup>th</sup> October, 2021. The selected questions will be answered by our expert panel of Scientists during an exclusive Q&A session, the schedule of which will be intimated later to the students whose questions have been selected.

We request your support in organizing the programme this year by ensuring the participation of maximum number of students from across Kerala. It will be a great opportunity to get familiarized with the advancements of Space technology and how it impacts and improves their everyday life. We would greatly appreciate if the students and schools can complete their registration by 01<sup>st</sup> October, 2021 for the smooth coordination of the event.

With regards, 

Biju Prasad B  
 Chairman,

'Reach out to Students' Organising committee
